

MONSELIC

Investor Archetype Profiles

A Structured Archetype Layer for Behavioral Identity

April 2026

Liovest AG

1. Document Purpose

This document presents the archetype profile layer within the MONSELIC system. Its purpose is to make long-term behavioral identity more legible through a structured set of recognizable investor profiles. It translates deeper behavioral interpretation into readable identity forms and establishes part of the profile language for future user-facing applications.

Within the broader MONSELIC framework, this layer functions as part of the system's identity output structure. It does not attempt to reduce investor behavior to a single score or simplified judgment. Instead, it provides a more interpretable profile form through which recurring behavioral structure can be recognized, compared, and expressed with greater clarity.

These profiles do not represent performance rankings or investment recommendations. They reflect recurring behavioral structures within the MONSELIC interpretive framework.

2. What These Profiles Represent

These profiles express recurring behavioral structures observed across time, pressure, uncertainty, and market change. They organize long-term investor behavior into distinct identity forms that can be read, compared, and understood more clearly.

Each profile carries its own internal logic, behavioral value, and real-world meaning.

The system identifies structural differences, not a hierarchy of worth.

3. Profile Logic

MONSELIC uses five dimensions in profile presentation.

3.1 Structural Dimensions

Four dimensions define the profile itself:

- **Discipline**
- **Restraint**
- **Resilience**
- **Evolution**

These four dimensions jointly shape the structural character of each investor profile.

3.2 Consistency

Consistency is treated separately.

It does not determine which profile a subject belongs to. It indicates whether that profile has fully emerged, whether it has stabilized within its camp, and whether the system can identify it with confidence.

In simple terms:

- The first four dimensions describe what kind of investor this is
- Consistency describes how fully that profile has taken form

4. Rating Logic

4.1 Structural Dimensions

- **S** = exceptionally rare completion state
- **A** = dominant dimension
- **B** = core supporting dimension
- **C** = background dimension
- **D** = raw or highly variable dimension

4.2 Consistency

- **D** = highly open state
- **C** = open state
- **B** = focusing state
- **A** = settled state
- **S** = rare fully formed state

5. The Six Archetype Camps

Defensive Preservation

Centered on survival, protection, and exposure control.

Steady Execution

Centered on rules, continuity, and behavioral reliability.

Balanced Allocation

Centered on equilibrium, coordination, and structural balance.

Proactive Advance

Centered on initiative, path-opening, and positional ambition.

High-Volatility Offensive

Centered on force, pressure tolerance, and high-amplitude participation.

Rhythm Perception

Centered on sensitivity to change, timing, and adaptive alignment.

6. The Twenty Archetype Profiles

Defensive Preservation

Centered on survival, protection, and exposure control.

01. Self-Preserver

Prioritizes protection of exposure the moment risk emerges.

Discipline C | Restraint A | Resilience C | Evolution D | Consistency D

02. Cautious Actor

Defined by caution, precision, and pre-emptive avoidance of traps.

Discipline A | Restraint B | Resilience C | Evolution D | Consistency C

03. Steadfast Survivor

Values staying power and the ability to remain unbroken across changing conditions.

Discipline B | Restraint B | Resilience A | Evolution D | Consistency A

Steady Execution

Centered on rules, continuity, and behavioral reliability.

04. Rule Keeper

Recognizes the value of rules and boundaries and begins to operate within them.

Discipline A | Restraint B | Resilience D | Evolution C | Consistency D

05. Executor

Turns rules, boundaries, and method into sustained behavioral structure.

Discipline B | Restraint A | Resilience C | Evolution D | Consistency B

06. Guardian

Maintains structural safety and defensive integrity over time.

Discipline B | Restraint B | Resilience A | Evolution C | Consistency A

Balanced Allocation

Centered on equilibrium, coordination, and structural balance.

07. Initiator

Opens the field and lays the first path before structure fully forms.

Discipline C | Restraint D | Resilience C | Evolution A | Consistency D

08. Coordinator

Balances multiple risks and opportunities to preserve overall equilibrium.

Discipline A | Restraint C | Resilience B | Evolution B | Consistency B

09. Orchestrator

Coordinates structure, timing, and resources through broad strategic vision.

Discipline B | Restraint C | Resilience B | Evolution A | Consistency A

Proactive Advance

Centered on initiative, path-opening, and positional ambition.

10. First Mover

Moves first in order to claim opportunity and position.

Discipline D | Restraint B | Resilience C | Evolution A | Consistency D

11. Pathfinder

Actively opens a path through opportunity rather than waiting for the environment to decide.

Discipline C | Restraint C | Resilience B | Evolution A | Consistency B

12. Trend Follower

Respects the main trend and moves with it as a core behavioral logic.

Discipline B | Restraint A | Resilience C | Evolution B | Consistency A

High-Volatility Offensive

Centered on force, pressure tolerance, and high-amplitude participation.

13. Momentum Surger

Releases strong momentum at critical moments in high-amplitude conditions.

Discipline D | Restraint C | Resilience A | Evolution B | Consistency D

14. Pressure Bearer

Maintains structural coherence under severe volatility and pressure.

Discipline C | Restraint D | Resilience A | Evolution B | Consistency B

15. Finisher

Delivers the decisive strike at the critical edge of pressure.

Discipline B | Restraint A | Resilience B | Evolution C | Consistency A

16. Sovereign

A rare profile able to preserve commanding structure, pressure, and authority under extreme volatility.

Discipline A | Restraint A | Resilience S | Evolution B | Consistency S

Rhythm Perception

Centered on sensitivity to change, timing, and adaptive alignment.

17. Sensor

Naturally sensitive to atmosphere, narrative, and rhythm, with form still in emergence.

Discipline D | Restraint B | Resilience D | Evolution A | Consistency D

18. Trend Reader

Turns sensitivity to change into stable directional judgment.

Discipline C | Restraint A | Resilience D | Evolution B | Consistency B

19. Pattern Reader

Reads situations, structural change, and deeper patterns in order to form mature judgment.

Discipline B | Restraint C | Resilience C | Evolution A | Consistency A

20. Cosmic Resonator

A rare profile capable of exceptional alignment with rhythm, field, and trend.

Discipline B | Restraint A | Resilience A | Evolution S | Consistency S

7. Future Application

This archetype architecture supports the future applied identity layer of MONSELIC. Over time, these profiles may be expressed through structured identity summaries, visual profile cards, maturity-linked signals, and other user-facing identity formats across future MONSELIC applications.

As MONSELIC continues to develop, this archetype layer may also support broader forms of profile presentation, interface logic, and identity-based interaction. In that sense, the profiles are not only descriptive outputs, but part of a larger system for making behavioral identity more visible, interpretable, and usable over time.

This document establishes part of the profile language for that future expression layer. It presents the current public form of the archetype system and provides a foundation for subsequent user-facing development as MONSELIC continues to evolve.
